

**MODEL ENGINEERING COLLEGE ERNAKULAM**  
**CS 334 NETWORK PROGRAMMING LAB**  
**CYCLE I**

<p><b>Expt No:1</b>  <b>&lt;date&gt;</b></p> <p><b>LAB 1</b>  <b>&lt;4/2/2019&gt;</b>  <b>&amp;</b>  <b>&lt;8/2/2019&gt;</b></p>	<p style="text-align: center;"><b><u>STUDY OF SYSTEM CALLS FOR OS PROGRAMMING</u></b></p> <p><b>AIM:</b> To study the system calls – create(), open(), read(), write(), close(), sleep(), exit(), unlink(), kill(), getpid(), getppid(), getuid(), getgid(), fork(), pipe(), fifo(), execl()</p> <p><b>creat() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>open() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>read() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>write() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>close() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>sleep() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>exit() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>unlink() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>kill() system call</b>          &lt;Header files, syntax and description&gt;</p> <p><b>Program No: (i):</b> To get the process id, parent process id, real user id, real group id, effective user id, effective group id.          &lt;Header files, syntax and description of getpid(), getppid(), getuid(), getgid(), geteuid(), getegid()&gt;          Program, Execution Steps, Output</p> <p><b>Program No: (ii):</b> Familiarization of fork() system call          &lt;Header files, syntax and description&gt;          Program, Execution Steps, Output</p>
--	---

	<p><b>Program No: (iii):</b> Familiarization of pipe() system call          &lt;Header files, syntax and description          Program, Execution Steps, Output</p> <p><b>Program No: (iv):</b> To create a FIFO (named pipe)          &lt;Header files, syntax and description&gt;          Program, Execution Steps, Output</p> <p><b>Program No: (v):</b> Familiarization of execl() system call          &lt;Header files, syntax and description&gt;          Program, Execution Steps, Output</p>
<b>Expt No:2</b> <date> <b>LAB 2</b> <11/2/2019> & <15/2/2019>	<p align="center"><b><u>FAMILIARISATION OF POSIX THREAD FUNCTIONS</u></b></p> <p><b>AIM:</b> To study the basic posix thread functions – pthread_create, pthread_join, pthread_self, pthread_detach, pthread_exit</p> <p>&lt;Header files, syntax and description&gt;          Program, Execution steps, Output</p>
<b>Expt No:3</b> <date> <b>LAB 3</b> <18/2/2019> & <25/2/2019>	<p align="center"><b><u>INTERPROCESS COMMUNICATION USING PIPES</u></b></p> <p><b>AIM:</b> To implement interprocess communication using two pipes</p> <p>&lt;Header files, syntax and description&gt;          Program, Execution steps, Diagram, Output</p>
<b>Expt No:4</b> <date> <b>LAB 3</b> <18/2/2019> & <25/2/2019>	<p align="center"><b><u>INTERPROCESS COMMUNICATION USING FIFO</u></b></p> <p><b>AIM:</b> To implement interprocess communication using fifo</p> <p>&lt;Header files, syntax and description&gt;          Program, Execution steps, Output</p>
<b>Expt No:5</b> <date> <b>LAB 4</b> <01/3/2019> & <11/3/2019>	<p align="center"><b><u>INTERPROCESS COMMUNICATION USING POSIX MESSAGE QUEUES</u></b></p> <p><b>AIM:</b> To implement interprocess communication using Message Queues .</p> <p>&lt;Header files, syntax and description&gt;          Program, Execution steps, Output</p>

<b>Expt No:6</b> <date> <b>LAB 5</b> <18/3/2019> & <22/3/2019>	<p align="center"><b><u>INTERPROCESS COMMUNICATION USING POSIX SHARED MEMORY</u></b></p> <p><b>AIM:</b> Write a program to create an integer variable using shared memory concept and increment the variable simultaneously by two processes. Use semaphores to avoid race conditions</p> <p>&lt;Header files, syntax and description&gt;</p> <p>Program, Execution steps, Output</p>
<b>Expt No: 7</b> <date> <b>LAB 6</b> <25/3/2019> & <29/3/2019>	<p align="center"><b><u>READERS-WRITERS PROBLEM</u></b></p> <p><b>AIM:</b> A Program to implement the Readers-Writers problem using Semaphores and shared memory</p> <p>&lt;Header files, syntax, algorithm and description&gt;</p> <p>Program, Execution steps, Output</p>
	<b><u>CYCLE II</u></b>
<b>Expt No:8</b> <date> <b>LAB 7</b> <01/4/2019> & <05/4/2019>	<p align="center"><b><u>STUDY OF SYSTEM CALLS FOR NETWORK PROGRAMMING</u></b></p> <p><b>AIM:</b> To study the system calls - Socket(), bind(), listen(), accept(), connect(),</p> <p>&lt;Header files, syntax and description&gt;</p> <p>Program, Execution Steps, Output</p>
<b>Expt No:9</b> <date> <b>LAB 8</b> <08/4/2019> & <12/4/2019>	<p align="center"><b><u>SOCKET PROGRAMMING USING TCP</u></b></p> <p>Implement client server communication using socket programming and TCP as transport layer protocol</p> <p>&lt;Header files, syntax, and description&gt;</p> <p>Program, Execution steps, Output</p>
<b>Expt No:10</b> <date> <b>LAB 8</b> <08/4/2019> & <12/4/2019>	<p align="center"><b><u>SOCKET PROGRAMMING USING UDP</u></b></p> <p>Implement client server communication using socket programming and UDP as transport layer protocol</p> <p>&lt;Header files, syntax, and description&gt;</p> <p>Program, Execution steps, Output</p>

<b>Expt No:11</b> <date> <b>LAB 9</b> <22/4/2019> & <26/4/2019>	<p style="text-align: center;"><b><u>MULTICLIENT CHAT SERVER USING TCP</u></b></p> Implement a multi client chat server using TCP as transport layer protocol <Header files, syntax, and description> Program, Execution steps, Output
<b>Expt No:12</b> <date> <b>LAB 10</b> <22/4/2019> & <26/4/2019>	<p style="text-align: center;"><b><u>SIMPLE MAIL TRANSFER PROTOCOL</u></b></p> Implement a simple mail transfer protocol <Header files, syntax, and description> Program, Execution steps, Output
